Meeting Note #3

Mar, 12, 2020

Topic: Hi-Fidelity Feedback

Attending:

Regina Fire & Protective Services officer [Angela]

Professor [Timothy]

Fire awareness group [Mohamed, Xinyu, Timothy]

Content:

- Every things in Balsamiq prototype are really great.
- However, there are too many stuffs and operations on the application.
- Keep the application simple and good learning would be great.
- Suggest to force on 9-1-1 call.
- Needing more detail for 911 call page.
- It will consume more time to do fire information pages.
- Swiping on the 911 calling pages will be cool ideas.
- Help mode is pretty good.

Team insight

- We would force on 911 call pages and add more detail and information.
- Our plan is get 911 simulation done firstly, then, to do the escape plan part.
- Fire information pages will be our further MVP.
- Start learning the swift develop software to code the iPhone application.
- Lots of the thing about swift need to learn and practice.
